Nightraiders

by Peter Filiberti

How to Play Nightraiders

Turn on the disk drive and place the Nightraider diskette in the drive.

Turn on the computer, the game will automatically boot and run. The main title screen will appear. Press any key to continue.

The menu screen will appear and shows: High Score / Most recent score / and difficulty level.

Choose a level from NOVICE (easiest) to NIGHTRAIDER (the hardest). Press START and go.

Start button restarts game. Option button pauses game. Any other key resumes play.

Your Plane Is Flying Over Enemy Territory

Your job is to destroy all military muscle of the enemy and get across the battlefield to attack the base.

Your fuel is indicated by a red line across the bottom of the screen along with the score and the number of ships you have left. The red line gets shorter as fuel is consumed. When the line is gone so are you.

Bomb a fuel depot and your fuel is magically replenished, so don't miss any of these.

The enemy will be shooting flack at you, so keep your eyes open, it's hard to see and harder yet to dodge!

As you fly over enemy territory you will encounter the following targets:

Tank	300 Points
Bridge	200 Points
Radar Tower	200 Points
Saucer	255 Points × Level
All Train Cars	Random Points
Missile	Random Points
Space Plane	100 Points × Level
Fuel Depot	Adds Fuel +100 Points
Missile Silo	400 Points

Advancing Levels

After destroying an enemy base you will receive a bonus of 1000 points multiplied by the level you are on. For example destroying an enemy base on level six is worth 6000 points. After destroying a base you are advanced to the next level where the battle is swifter and the enemy more powerful!! After you complete the commander level (level 5) you will receive an extra ship. Also notice that the harder the level, the faster the fuel is used up!! It's tough out there so

Good Luck and Have Fun!
